

AMIYA DAS

Senior Software Engineer

Kolkata, India | +91 7059633072 | dasamiya7059@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with **5+ years** of experience building scalable, high-performance web applications and **AI-integrated systems**. Strong track record in **React.js, Next.js, TypeScript, Node.js, and Python** — with hands-on experience in **agentic AI workflows** using **LangChain, LangGraph**, and LLM integrations (**OpenAI, Anthropic, Hugging Face**). Delivered **~30% rendering performance improvements** and reduced feature development time by **70%** through reusable component systems. Creator of **react-perf-guard**, an open-source React performance monitoring package on npm. Comfortable leading architecture decisions, mentoring engineers, and shipping production-ready solutions in fast-paced, cross-functional teams.

CORE COMPETENCIES

Languages & Frameworks:	React.js, Next.js, TypeScript, JavaScript (ES2022+), Python, Node.js, Express.js, MongoDB, HTML5, CSS3, SASS/SCSS, Bootstrap
AI & LLM:	LangChain, LangGraph, OpenAI API, Anthropic API, Hugging Face, RAG Implementation, Prompt Engineering, Agentic Workflows, Chatbot Integration
State Management & UI:	Redux, Zustand, Recoil, HookState, Material UI, AG Grid, Responsive Design, Pixel-perfect UI
Performance & SEO:	Web Workers, Code Splitting, SSR, Memoization, Core Web Vitals, Lazy Loading, SEO Compatibility, OG Tags, OG Title, Google Analytics (G-tag), Schema Markup
Testing & Quality:	Jest, Cypress (E2E), Storybook, React Testing Library, WCAG 2.1 AA
Cloud & DevOps:	Git, GitHub Actions, CI/CD Pipelines, Azure DevOps (familiar)
Methodologies:	Agile / Scrum, Jira, Component-Driven Architecture, Nx Monorepo, Scalable Frontend Architecture

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Sep 2024 – Present

Webskitters Technology Pvt Ltd — Kolkata, India

Healthcare & SaaS platform team — React/TypeScript + AI-integrated applications

- Architected scalable **React.js/Next.js/TypeScript** frontend applications for healthcare and SaaS platforms supporting **10,000+ concurrent users**, owning delivery end-to-end from design through production rollout.
- Integrated **OpenAI and Anthropic APIs** into customer-facing products, enabling AI-assisted features including intelligent form autofill, content suggestions, and chatbot interfaces — reducing manual input effort by **~40%**.
- Built **agentic AI workflows** using **LangChain and LangGraph** for automated data processing pipelines, cutting repetitive operational tasks by **~60%** and improving internal team productivity.
- Developed **Python**-based automation scripts and data processing pipelines to support backend AI services and internal tooling workflows.
- Engineered **AG Grid** systems handling **1,000+ records** with Web Workers, auto-save, and real-time validation — eliminating UI freezes and improving perceived performance by **~45%**.
- Implemented React rendering pipeline optimisations (memoization, virtualisation, selective re-renders) achieving **~30% improvement** in frontend rendering performance and strong Core Web Vitals scores.
- Built and maintained a **Storybook-documented reusable component library** in an **Nx monorepo** environment, reducing cross-team duplication and accelerating feature delivery.

- Implemented **WCAG 2.1 AA** accessibility standards and SASS/Bootstrap responsive design across all customer-facing interfaces.
- Integrated **GraphQL and REST APIs** with type-safe TypeScript patterns; set up **GitHub Actions CI/CD** and Jest + Cypress test suites, reducing regression defects significantly.
- Led architecture decisions across Agile sprints; **awarded Best Performer within 4 months** of joining.

Frontend Engineer

Aug 2021 – Aug 2024

Broadifi Tech Pvt Ltd — Kolkata, India

Diverse client portfolio — enterprise web applications across finance, logistics, and B2B SaaS

- Built enterprise-grade **React.js/TypeScript** frontend applications across **finance, logistics, and B2B SaaS** client portfolios, owning implementation from requirements through deployment.
- Integrated **ChatGPT and Hugging Face** models into internal tooling for automated content generation and sentiment tagging, improving content team output by **~50%**.
- Designed a configuration-driven form engine that reduced new-feature development time by **70%**, enabling rapid product iteration without code duplication — still in production use.
- Implemented **prompt engineering workflows** for LLM-powered features, including dynamic prompt templating, context management, and response post-processing pipelines.
- Used **Python scripts** for data transformation, report automation, and integration testing support across client projects.
- Developed **secure role-based authentication** and authorisation systems (OWASP-aligned) supporting multiple user-access tiers across all client products.
- Led frontend architecture planning and **mentored a 3-member team**; set up GitHub Actions CI/CD and Cypress E2E regression suites.
- Ensured **WCAG accessibility compliance**, cross-browser compatibility, and responsive layouts across all client-facing products.

OPEN-SOURCE PROJECT

Creator & Maintainer — react-perf-guard

npmjs.com/package/react-perf-guard | 2026 – Present

- Published a **developer-first React runtime performance monitoring package** on npm for detecting rendering bottlenecks and Core Web Vitals regressions during development.
- Built **rule-based re-render detection**, continuous performance monitoring, and actionable developer insights with near-zero configuration overhead.
- Managed full package lifecycle: architecture design, **TypeScript + Python tooling**, npm distribution, documentation, and community adoption.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Academy of Technology, Hooghly, West Bengal | Graduated 2021

GPA: 8.92 / 10

ACHIEVEMENTS & RECOGNITION

- **Best Performer Award** — Webskitters Technology Pvt Ltd (within first **4 months**).
- Published and maintain **react-perf-guard** — open-source React performance monitoring npm package with **Core Web Vitals** tracking.
